

The first of these is the *Journal of the American Medical Association* (JAMA), which has been the most influential of the medical journals in the United States since its founding in 1883. JAMA is a weekly journal that publishes research, clinical reports, and reviews. It is published by the American Medical Association (AMA), which is a professional association of physicians. JAMA is known for its high standards of scientific rigor and its commitment to the advancement of medical knowledge. It is also known for its role in the development of medical policy and its influence on the medical profession. JAMA is one of the most widely read and cited medical journals in the world.

The second of these journals is the *New England Journal of Medicine* (NEJM), which was founded in 1812. NEJM is a weekly journal that publishes research, clinical reports, and reviews. It is published by the Massachusetts Medical Society, which is a professional association of physicians. NEJM is known for its high standards of scientific rigor and its commitment to the advancement of medical knowledge. It is also known for its role in the development of medical policy and its influence on the medical profession. NEJM is one of the most widely read and cited medical journals in the world.

The third of these journals is the *Lancet*, which was founded in 1823. The Lancet is a weekly journal that publishes research, clinical reports, and reviews. It is published by the British Medical Association (BMA), which is a professional association of physicians. The Lancet is known for its high standards of scientific rigor and its commitment to the advancement of medical knowledge. It is also known for its role in the development of medical policy and its influence on the medical profession. The Lancet is one of the most widely read and cited medical journals in the world.

These three journals are the most influential of the medical journals in the United States. They are known for their high standards of scientific rigor and their commitment to the advancement of medical knowledge. They are also known for their role in the development of medical policy and their influence on the medical profession.

~~SECRET~~

Target 8105 - Three reports based on a photograph of the target.

1. DC-79, Viewer #31, session of 5 February 1981.

Viewer said the target was in the Eastern part of the U.S. Later, he suggested Atlanta, Georgia (on 5 February).

Viewer said the target would be walking on a street on 19 February, which he believed to be New York City. He believed the target would be on 5th Avenue, perhaps in the 80's, near Central Park. He also saw the viewer on what he thought might be Park Avenue, near the U.N. building.

The viewer thought the target's name was Yuriy VASILYEV.

2. Viewer #08, session of 12 February 1981.

Viewer saw the target in Europe on 12 February, in Bonn or Berlin or Hamburg or Bladensburg.

Viewer said target's first name was Glauter or Lauter and his last name was Otenburg or Rotenburg.

Viewer #08 of 19 February 1981.

Viewer placed the target on 19 February in a city in Italy, France or an East European city. Viewer said he worked in an agency dealing in boat travel.
